

AMENDMENTS

This listing of claims replaces all prior versions and listings of claims in the application.

IN THE CLAIMS

1. (Currently Amended) Method for multi-coat refinishing of substrates comprising the following steps:
 - A) applying a first basecoat of paint consisting of a solvent-based colour- and/or special-effect-imparting coating composition to a substrate precoated with a primer and/or a filler and/or further coating compositions,
 - B) applying a second basecoat of paint consisting of a water-based colour- and/or special-effect-imparting coating composition to the layer obtained under A) and
 - C) applying a clear solvent- or water-based lacquer coat consisting of a transparent clear coat to the paint coat obtained under B).
2. (Canceled).
3. (Original) Method according to claim 1, wherein the solvent-based colour- and/or special-effect-imparting coating composition is a solid-color basecoat pigmented with colour-imparting adsorption pigments and the water-based colour- and/or special-effect-imparting coating composition is a water-based basecoat pigmented with special-effect pigments.
4. (Original) Method according to claim 1, wherein the solvent-based colour- and/or special-effect-imparting coating composition is a solid-color two-component coating composition pigmented with colour-imparting absorption pigments.

5. (Original) Method according to claim 4, wherein the solid-color two-component coating composition contains polyisocyanates as cross-linking agents.
6. (Original) Method according to claim 1, wherein both the solvent-based colour- and/or special-effect-imparting coating composition and the water-based colour- and/or special-effect-imparting coating composition are solid-color basecoats pigmented with colour-imparting absorption pigments.
7. (Canceled).
8. (Canceled).
9. (Original) Method according to claim 1, wherein the substrates are vehicles or vehicle components.
10. (Canceled).
11. (Original) A substrate coated according to the method of claim 1.
